- Power BI

About Me

Motivated and detail-oriented Software Engineering student with a strong foundation in data structures, algorithms, and object-oriented programming. Proficient in Java, C++ and JavaScript, with hands-on experience building full-stack web applications. Seeking a 2025 Software Engineering Internship to apply my technical skills and contribute to innovative projects.

Education

BSc (Hons) In Software Engineering (Undergraduate)
SLIIT CITY UNI - Colombo
2023 - Present

G.C.E. Advanced Level
G.C.E. Ordinary Level
Maris Stella Collage - Negombo
2015 - 2019

Projects

Anuradha Hardware Website 2025
- developed a complete e-commerce website for a hardware store using HTML, CSS, and JavaScript for the front end. The back end, built with PHP and MySQL, handles all product and user data, enabling secure shopping cart functionality and online transactions.

Weather Checking App 2025
- Developed a mobile weather application in Java for Android, utilizing two different APIs to fetch real-time weather data and dynamic background images based on the current conditions. The app features a simple, user-friendly interface for checking weather forecasts in various locations.

Medicare Management System 2025
- Developed a Java desktop management system using IntelliJ IDEA to manage doctors, patients, and schedules. The application allows users to easily add, remove, and edit records.
